U.S.A.

Attention:- Mr Tommy Felch, General Manager.

Ref:- SAGT/IMPISA Contract – Delivery & Installation of equipment, Colombo Port, Sri Lanka

Dear Sir,

SAGT wishes to express our complete satisfaction as to the work carried out by your company with reference to the above mentioned contract. As you are aware IMPISA were awarded a contract to supply & install six Super Post Panamax & three Post Panamax Container Cranes.

IMPISA fabricated the first three units in China with the remaining six units fabricated in Indonesia. Load on & Load off, engineering and shipping arrangements was contracted by IMPISA to Global Rigging. The four shipments involved took place during periods from October 2001 to the last shipment being completed in July 2003. Weather conditions for both load on and off load varied greatly during these periods and presented many possible problems to all concerned.

During our involvement with Global Rigging and their staff we found them to be a very professional & reliable company. The on/off loads took place without incident and within time frames as given by Global Rigging. In some cases on/off loads to place in very trying sea conditions yet all went as planned. I would have no hesitation in recommending Global Rigging & Transport to any company considering similar works to that undertaken by us.

Yours Faithfully

Charlie Rutter
